akhosraviani@rutan.com

Arman Khosraviani is a registered U.S. patent agent with prosecution experience in technology areas, including aerospace manufacturing management, artificial intelligence, Internet of Things, semiconductor processing, solid-state devices, software, medical devices, physics, optics, electrical circuits, and biotechnology.

Arman has worked for smart home startup companies, Danale Inc., and Alcidae Inc., building their IP portfolios by preparing and prosecuting patents directed to smart home devices and human-machine interface systems under U.S. and Patent Cooperation Treaty (PCT) practices; trademarks for logos, slogans, and platforms; and patentability opinions. Arman also presented at CES 2020 for Alcidae Inc., as an exhibit representative helping consumers understand Alcidae products as well as helping to acquire new partnerships, distributors, and retailers. Arman also helped with product branding, marketing and customer service to prepare Alcidae products for consideration at retail stores.

Arman was also a former U.S. patent examiner managing patent applications in class 257 and class 438 for Art Unit 2818 that includes Active Solid-State Devices and Semiconductor Device Manufacturing.
