

INTERNET OF THINGS (IOT)

Rutan's attorneys excel at providing legal services to clients dealing with businesses and technology relating to IoT.

With experience handling matters for numerous clients in both Southern California and Silicon Valley, Rutan's attorneys are uniquely positioned to assist our clients with complex matters related to the technology surrounding the IoT industry. We have experience representing our clients in intellectual properties matters involving IoT technologies, especially development and protection of patent portfolios. Rutan's attorneys regularly attend and participate in seminars and conferences related to the latest technology trends for both the legal and engineering aspects. We understand how to apply the law to the most cutting-edge technology to guide out clients to success.
