

COPYRIGHTS

The protection and enforcement of copyrighted works is of great importance to artists and business, particularly with the exposure of copyrighted works through the Internet, making them vulnerable to unauthorized use by others. Rutan's Copyright Practice specializes in assisting clients in protecting their valuable copyrights, both domestically and internationally, in diverse spectrums, including software, architectural drawings, websites, literary works and works of art. We also assist clients in negotiating license agreements, IP purchase agreements, transfer of ownership agreements and due diligence reviews.
