

TRADEMARKS

In today's modern world, the protection of a company's brand is an essential component of success in an ever increasingly competitive and global environment. Our Trademark Practice specializes in assisting clients across a variety of industries in the protection of their trademark portfolios, both domestically and internationally. We advise clients throughout the trademark process, including assisting in selection of trademarks, prosecuting and protecting them, and enforcing clients' trademark rights. We regularly appear before the Trademark Trial and Appeal Board on behalf of our clients in successfully resolving trademark disputes and work with an extensive group of international law firms around the world in the resolution of trademark disputes in foreign tribunals.

Our trademark professionals also assist clients in domain name disputes, license agreements, IP purchase agreements, transfer of ownership agreements, due diligence reviews and marketing reviews and clearances. We are aware that each client's situation is unique, so if you require assistance or advice relative to your particular trademark needs, we are available to assist you and act as a powerful advocate on your behalf.
